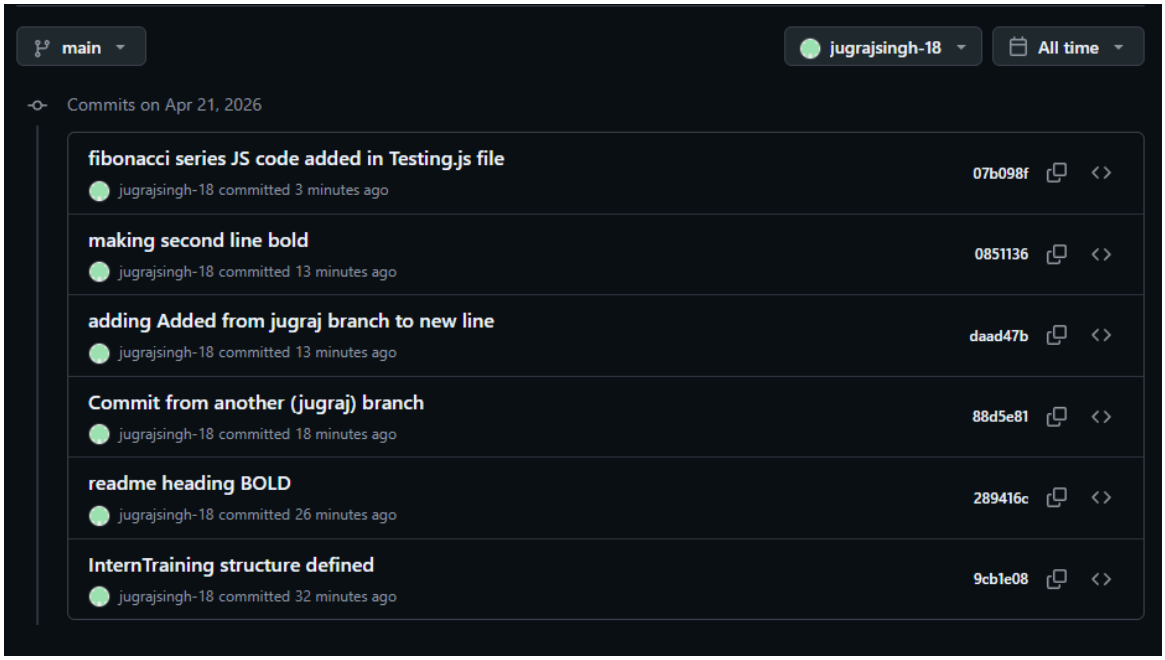
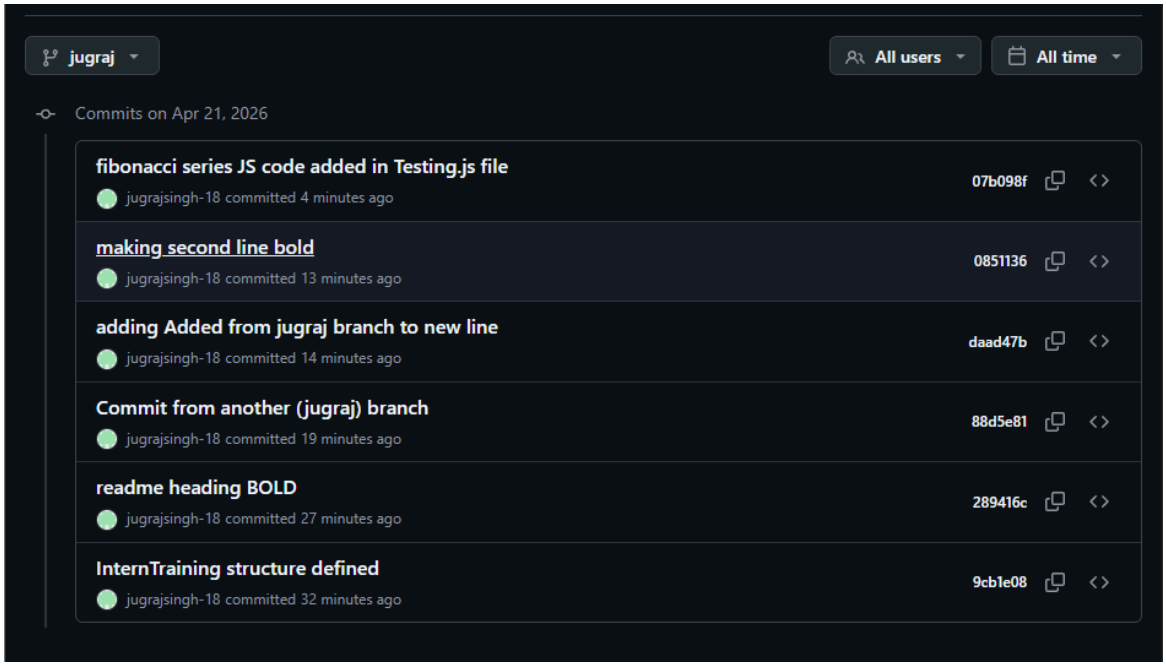
Learning Report of Git

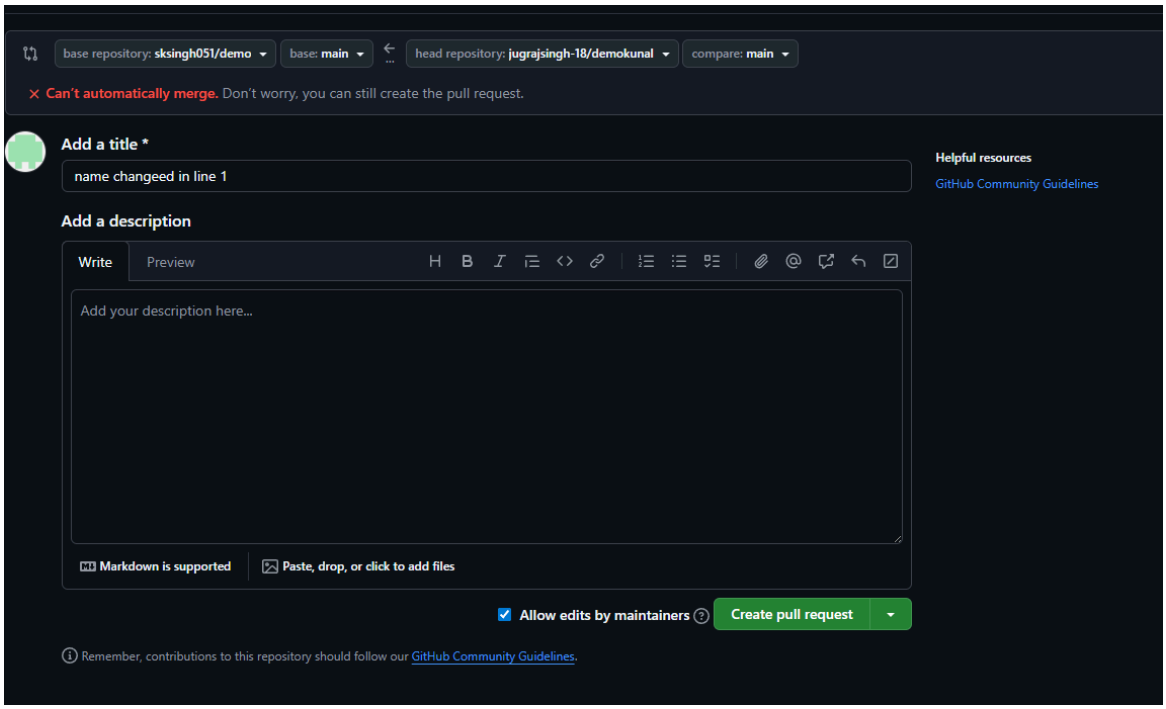
- **First of all installed all required software.**
  - VS code
  - Nodejs
  - MYSQL server
  - POSTGRES server
  - DBeaver
  - mongoDB compass
- **GIT**
  - Installed GIT and created account on github.
  - setup the GIT by connecting it to the GITHUB using SSH key
    - `git config --global user.name "jugrajsingh-18"`
    - `git config --global user.email "jugrajsingh18@outlook.com`
  - **Created new Repository named fullStackInternTraining**
    - Added readme.md file and Phase01_Git_OOP folder with Testing.js file.
    - Created another branch named Jugraj and also commited using that branch also.
    - **MAIN BRANCH COMMITS**



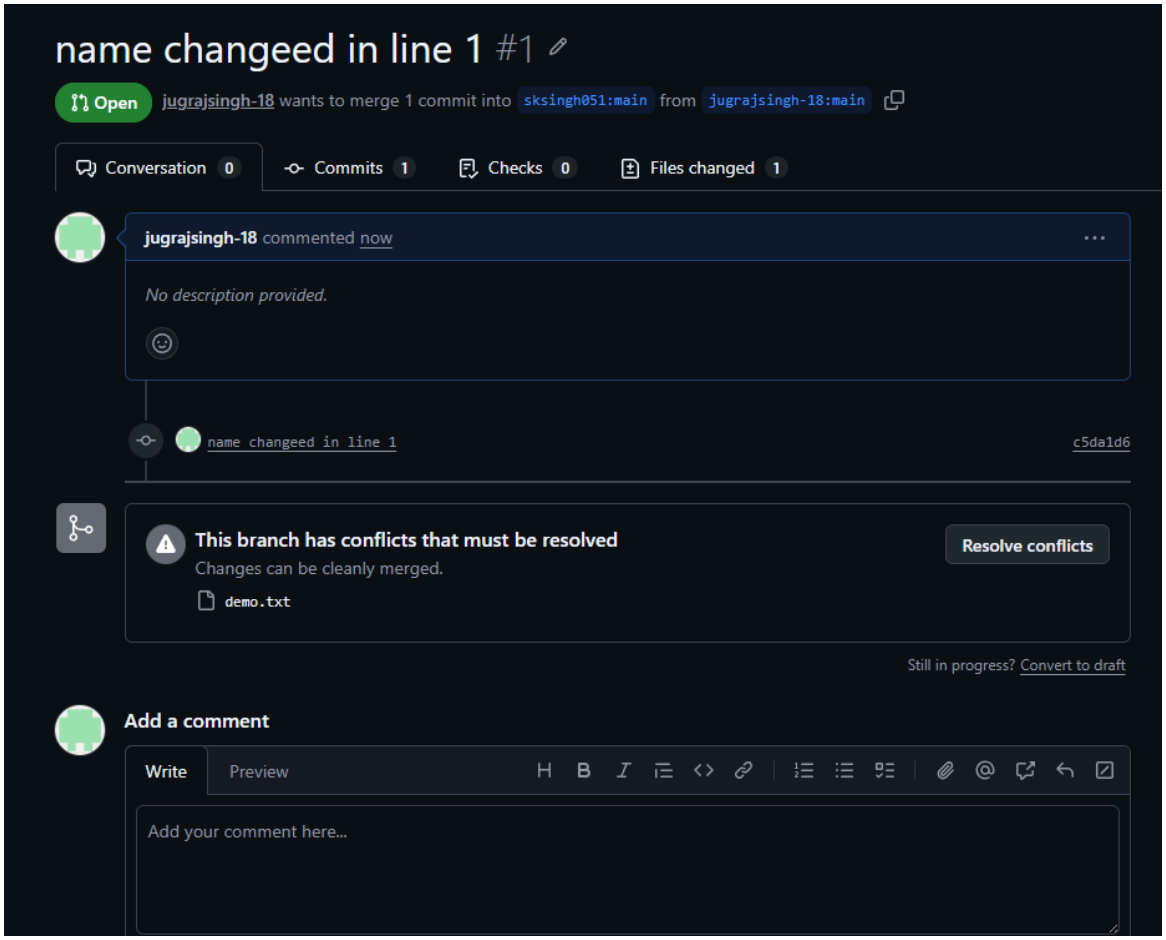
- **JUGRAJ BRANCH COMMITS**



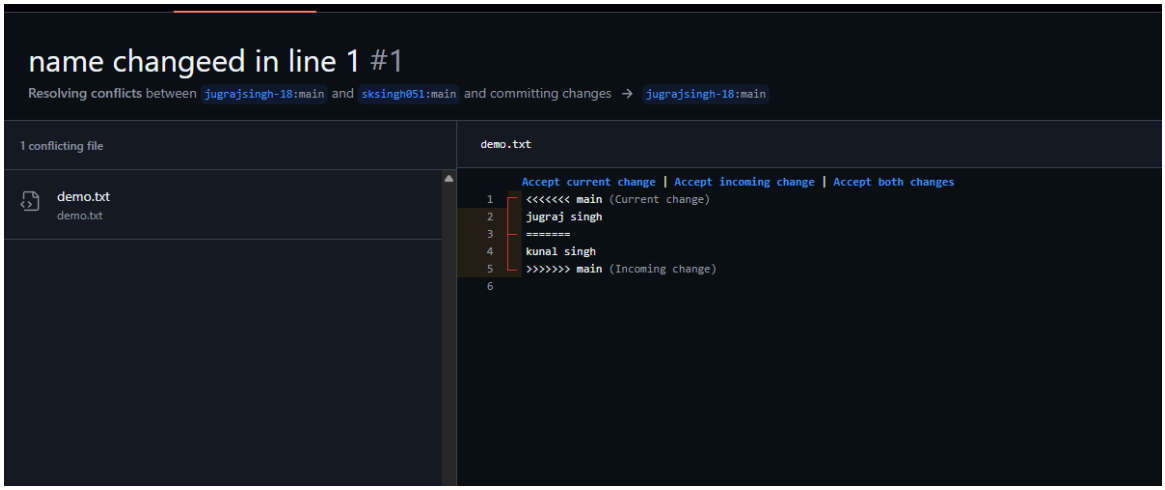
- ## Basic commands
  - `git add filename`
  - `git add .` (adds all changed files)
  - `git status` (To check the status of current state)
  - `git clone` (To clone the repository)
  - `git rm` (To remove the file)
  - `git commit -m "commit message"`
  - `git merge branchName` (To merge from the branch)
  - `git branch` (to create branch)
  - `git switch branchName` (To switch between branches)
  - `git push -u origin main` (To push over code on github)
- ## Solved Merge conflict
  - Forked my team mate's repository and made changes on the same line that my friend did.
  - Below are the screenshots of how conflict was solved.
  - **STEP-1 Trying to merge main branch of DEMO repository cannot merge automatically ,failed due to conflict**



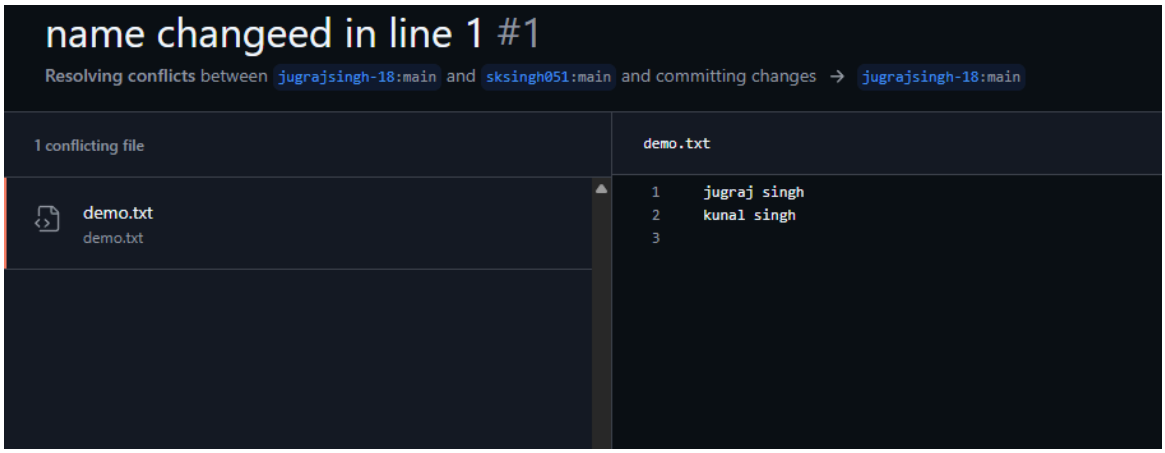
- **STEP-2 Resolving Conflict**



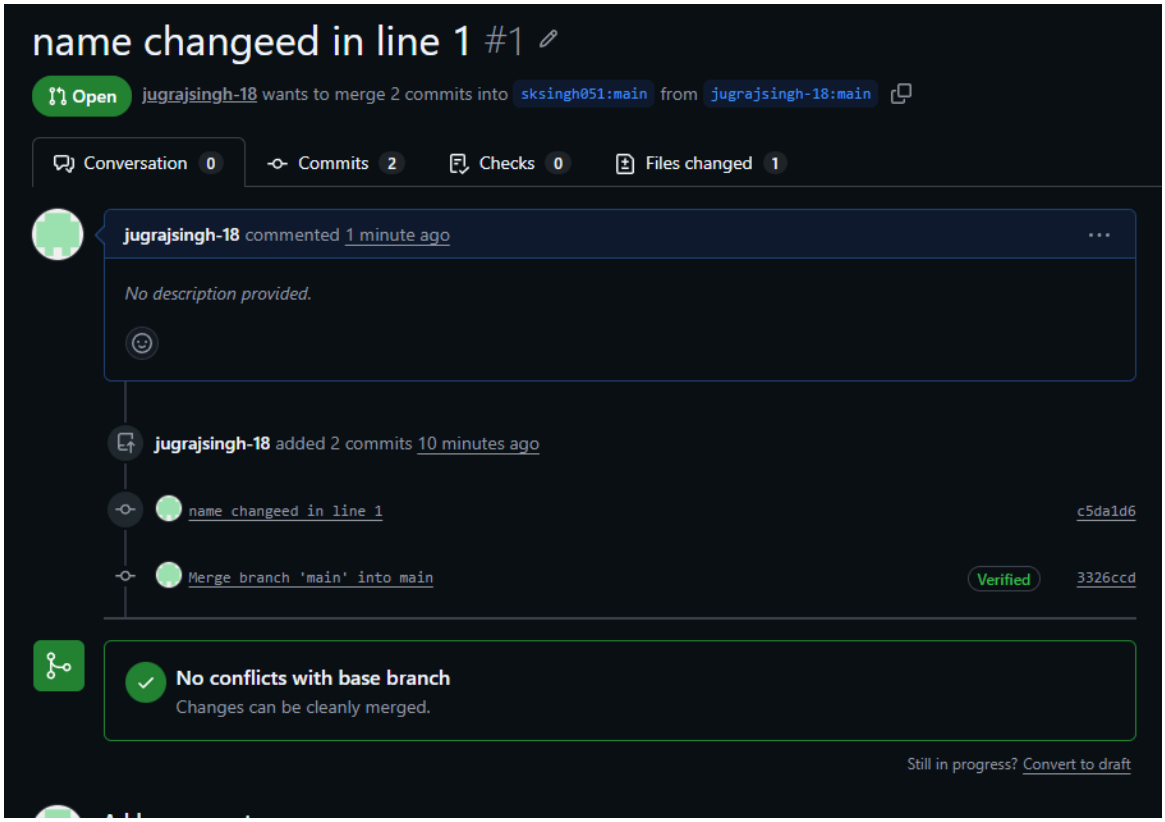
- **STEP-3 Resolving conflict manually**

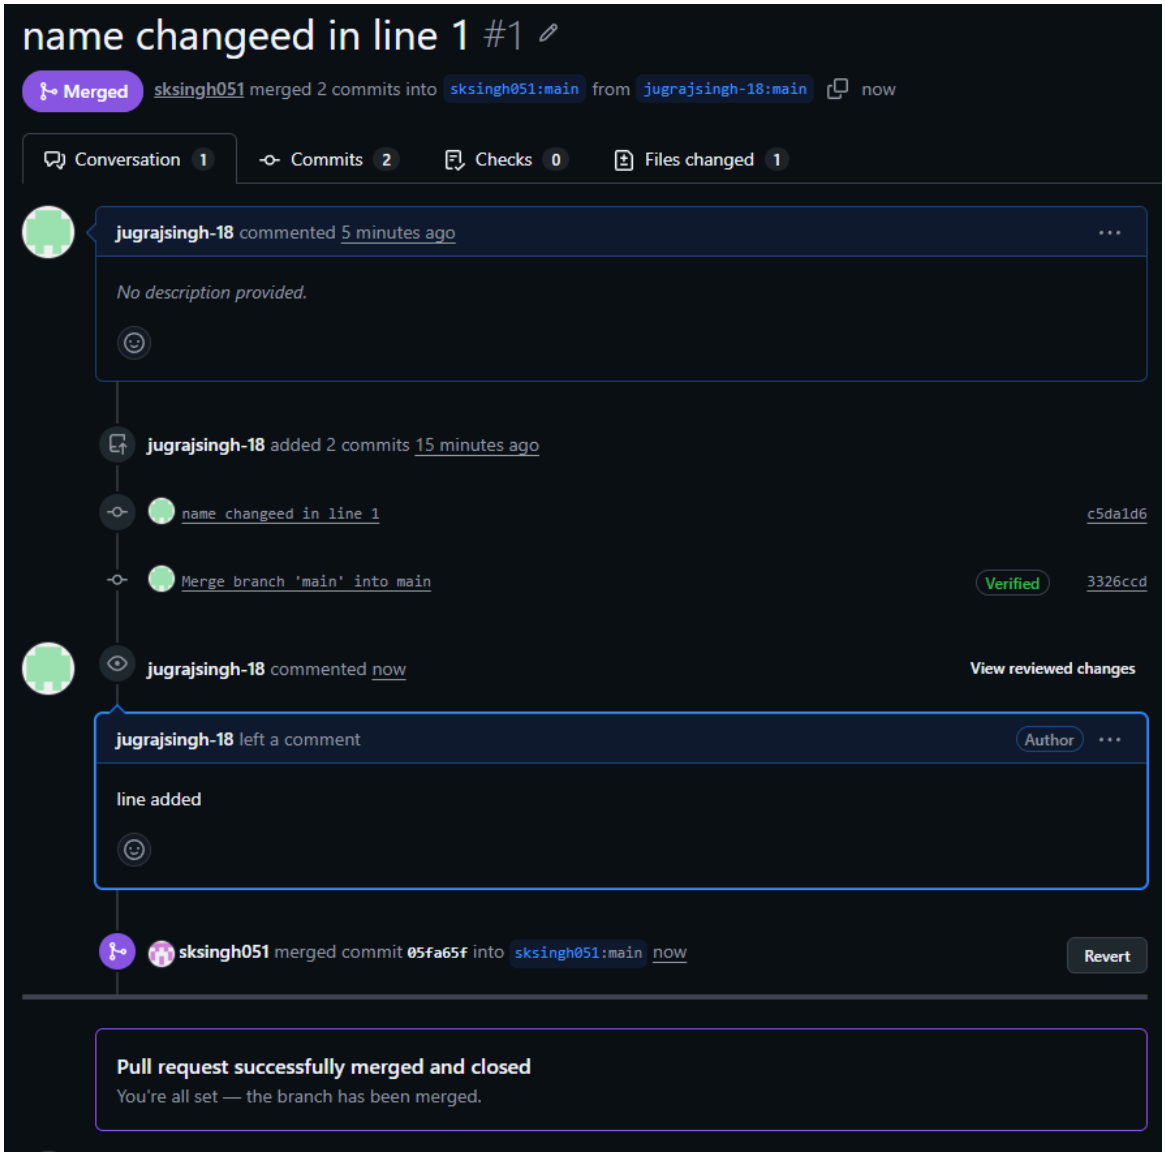


- **STEP-4 Conflict resolved**



- **STEP-5 Creating pull request after resolving conflict**





- **STEP-6 Pull request merge successfully**
